CARTOGRAPHY

Survey of the Azores, with Suggestions for Commercial Improvements

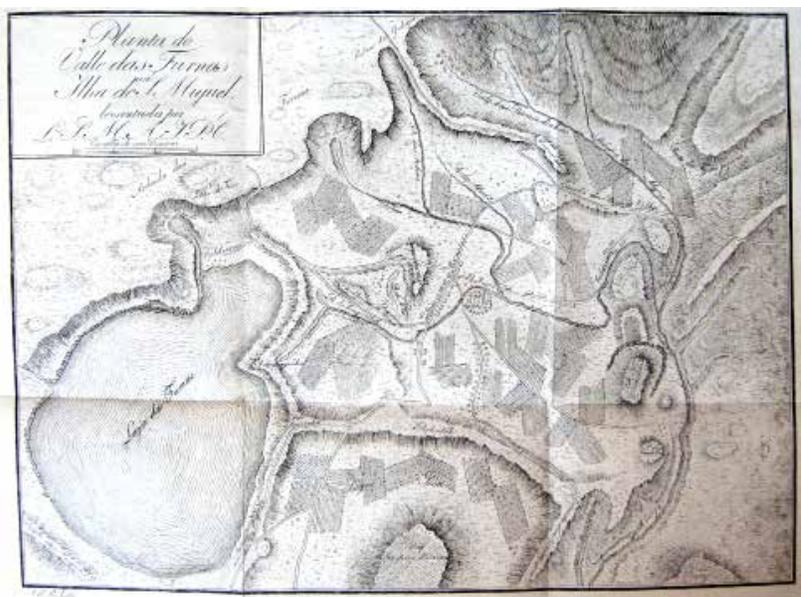

1. ALBUQUERQUE, Luís da Silva Mouzinho de, and Ignacio Pitta de Castro Menezes. *Observações sobre a Ilha de S. Miguel recolhidas pela comissão enviada á mesma ilha em Agosto de 1825, e regressada em Outubro do mesmo anno.* Lisbon: Na Impressão Regia, 1826. Large 4° (27 x 20.5 cm.), twentieth-century tan sheep (third quarter? very slight wear), smooth spine gilt, covers with double-ruled borders in blind, front cover with authors, title, and date in gilt, machine-marbled endleaves, top edges rouged, other edges uncut. Woodcut Portuguese royal arms on title page. Internally fresh, clean, and crisp. Overall in very good to fine condition. 43 pp., three large lithographic folding maps. \$800.00

FIRST EDITION. There exists a facsimile edition of 1989 published by the Câmara Municipal de Povoação, which appears to be of even greater rarity than the original. *Observações* includes a history of São Miguel since its discovery by the Portuguese in 1427, a survey of its secular and ecclesiastical divisions, and statistics on military, agriculture, education, trade, and property ownership. The list of necessary improvements (pp. 34-36) includes a larger bay and better roads. Valle das Furnas and its waters are considered on pp. 37-43.

The large folding lithographs include a military and hydrographic map of the Island of São Miguel (38.6 x 61 cm.); a plan of the Valle das Furnas on the same island (36 x 47.5 cm.); and a plan of the hot springs in the Valle das Furnas (36.7 x 45.8 cm.). The first was prepared by Lieutenant Colonel José Carlos de Figueiredo in 1824, while the two plans were prepared by the authors in 1825.

Mousinho de Albuquerque (1792-1846), became a colonel in the army engineering corps, Provador da Casa da Moeda (where he lectured on physics and chemistry), Governor of Madeira, Inspector of Public Works, deputy in various legislatures, and minister in several constitutional governments. An active proponent of the liberal cause, he died at Torres Vedras of a bullet wound in the Lutas da Patuleia. A member of the Academia Real das Sciencias de Lisboa, his textbook *Curso elementar de física e química* (5 volumes, Lisbon 1824) is said to be the first such complete work in Portuguese, while *Ideias sobre o estabelecimento da instrução publica* (Paris 1823) was a comprehensive plan for university reform.

* Innocência V, 323. OCLC: 27968704 (University of Massachusetts-Dartmouth, Harvard Business School, Newberry Library, Washington University in St. Louis, Bibliothèque central du Museum national d'histoire naturelle, Bibliothèque interuniversitaire Sainte-Geneviève, Universitätsbibliothek Kassel); 458858015 (Bibliothèque nationale de France); 504308498 (British Library). Porbase locates seven copies: two in the Biblioteca Nacional de Portugal, three in the Instituto de Investigação Científica e Tropical, and one each in the Biblioteca João Paulo II-Universidade Católica Portuguesa, and the Biblioteca Central da Marinha. Copac repeats British Library only.

BANDEIRA, Bernardo de Sá Nogueira de Figueiredo Sá da, 1º Barão and later Marquês de. *Faits et considérations relatives aux droits du Portugal sur les territoires de Molembo, de Cabinde, et d'Ambriz et autres lieux de la côte occidentale d'Afrique située entre le 5e degré 12 minutes et le 8e degré de latitude australe.* Lisbon: Imprimerie Nationale, 1855. Large 8°, recent navy half calf, gilt spine with raised bands in six compartments, front printed wrapper bound in. Woodcut Portuguese royal arms on title page. Light browning. In very good condition. 71 pp., 5 folding lithographic maps and plans. \$650.00

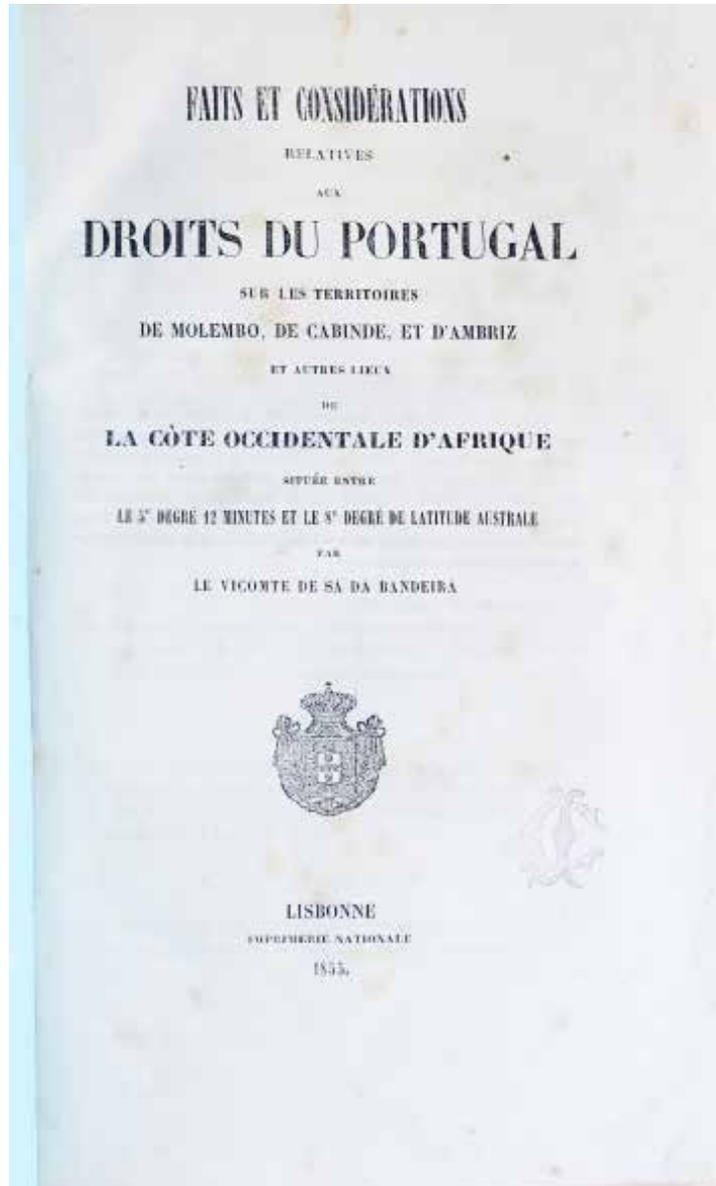

First Edition in French of a work written to supplement the Visconde de Santarem's *Demonstração*. Two of the folding plans show Portuguese forts in Angola, one shows the provinces of Mosullo and Bombe (1790-1791), and one is a topographical map of Ambriz. This French edition has two more plates than the Portuguese edition: one showing the coast of Angola, another a plan of the Fort of Cabinda. The captions and legends, and in some cases the place names, are in French rather than Portuguese.

* Cf. Innocência I, 384: the Portuguese edition (same printer and year), calling for only 3 "plantas." NUC: DLC, InU, CtY, PHi. Thunot y C^a; text Paris: en casa del Autor and Chile: en el Museo de Historia Natural de Santiago, 1844-1871. Some foxing to text, very occasional marginal spotting to plates, tear in lower margin of one plate (affecting caption). A handsome set overall. Rubberstamps of former owner on all half-titles, and on titles of text volumes.

30 volumes.\$50,000.00

FIRST EDITION. Monumental account of the natural and civil history of Chile, with two volumes of beautiful illustrations, mostly hand-colored. Gay's work set the tone for all future historiographers of Chile with its meticulous examination of sources, including contemporary documents from the period immediately following the conquest.

The overall condition of this copy as well as the quality of the plates and coloring are far superior to most. In fact, many copies are without coloring altogether. In addition, this set has the complete text, which is unusual since the work was issued over a period of 27 years.

The two volumes of the atlas contain a total of 315 plates: one tinted lithographic frontispiece portrait; 20 engraved maps plus a folding cloth-backed map of Chile; two hand-colored plates of antiquities; 53 lithographic plates of views and costumes (12 are hand-finished colored, 41 are tinted); and 238 hand-colored engraved plates (103 botanical, 135 zoological).

The text is divided as follows: *Historia*, 8 volumes; *Documentos*, 2 volumes; *Agricultura*, 2 volumes; *Botánica*, 8 volumes; and *Zoología*, 8 volumes.

Gay, a French botanist, was commissioned in 1830 by the government of Chile to carry out a thorough scientific survey of the country and to produce a detailed description of its geography, geology and natural history. To accomplish this, Gay traveled from province to province for eleven years. In 1839 he was persuaded to add political history to the project, but only the section of the work covering the history of Chile up to the time of the discovery and conquest are his work. When he became too busy writing the volumes on natural history, the task of writing the political history was handed over to Francisco de Paula Noriega. The five volumes of history covering the discovery to 1810 are acknowledged to have flaws, but constitute the first reasonably complete picture of Chilean history written with modern historiographical methodology.

Special Issue in Publisher's Leather Binding

***13. Livro de Lisuarte de Abreu.** Lisbon: Comissão Nacional para as Comemorações dos Descobrimentos Portugueses, 1992. Folio (30.5 x 21.3 cm.), publisher's tan sheep, spine with raised bands in five

compartments, decorated in blind, crimson leather lettering piece in second compartment from head, gilt short-title and date, covers also decorated in blind, pictorial endleaves. Profusely illustrated in color. As new. 55 pp., (1), 19, 92, 1 blank, (1) ll. ISBN: none. \$600.00

FIRST and ONLY EDITION, one of a small but unspecified number of special copies in a publisher's leather binding. Magnificently produced full-color facsimile of the original manuscript in the Pierpont Morgan Library. Besides much other data, it includes an illustrated relation of the India fleets, from that of Vasco da Gama (1497-1499) until the voyage of D. Jorge de Sousa (1563). Only two manuscripts with this sort of illustration are known to exist: the other one, the "Livro das Armadas" in the Academia de Ciências, Lisbon, covers the period 1497 to 1567, but lacks the fleet of 1517.

The Morgan manuscript consists, effectively, of three parts. Part I contains a group of texts, copied no doubt by order of Lisuarte de Abreu, including a diary of the voyage of the nau *Rainha* from Lisbon to Goa in the fleet commanded by D. Constantino de Bragança in 1558. D. Constantino paused for 18 days in Mozambique, during which time he sent a messenger-ship to Sofala, mainly to obtain information about Turkish movements. Lisuarte de Abreu was a member of this mission. In the same part of the manuscript is another description of the same voyage, this time in the form of a "relation." There are also copies of various letters and documents of the period.

Part II is a list of the governors and viceroys of India to 1558, with unusually bold and striking full-page color portraits of these officials.

Part III, perhaps the best-known part, contains color representations of the ships that made up the various fleets, with the names of the captains in almost every case. There are also illustrations of naval battles. This part of the manuscript was made by order of the governor Jorge Cabral, in 1550, but the illustrator continued his work up to the 1563 fleet, and included naval engagements, especially those led by D. Fernando de Monroy and D. Diogo de Noronha against Turkish galleys. Several of the fleets stopped in Brazil on the outward voyage, beginning with that of Pedro Alvares Cabral in 1500, making this a crucial document for the early history of that country.

The late Professor Luís de Albuquerque provided an introduction (pp. 11-31), which is followed by Maria Luísa Esteves' transcription of the text (pp. 33-55).

***17. MEDINA, Pedro de.** *Regimiento de navegación compuesto por el maestro Pedro de Medina (1563), ahora nuevamente publicado por el Instituto de España e edición facsímile.* Introduction by Julio F. Guillén. Madrid: Instituto de España, 1964. Large 8°, original printed wrappers. Uncut and unopened. Very minor soiling to front wrapper. Internally very fine. Overall in very good to fine condition. (2 blank ll.), 156 pp., (1 l. colophon, 1 blank l.). Tables and illustrations in text. One of 1,000 copies. \$100.00

Facsimile edition, with a new introduction, of what is usually counted as the second edition of an important manual on navigation, originally published in Seville, 1552. The 1563 edition is so changed as to be in reality a completely new work. The author speaks of it in the dedication as a separate work, stating that he wrote first the *Arte de navegar* (Valladolid, 1545), then the *Regimiento* of 1552, and finally this work, because men were sailing more frequently and needed to know “los casos de peligros que navegando les pueden suceder.” These dangers Medina set forth in the “Segunda parte,” ff. 57r-77r, which comprises about a quarter of the book and did not appear earlier. Its twenty “Avisos a los navegantes” cover such matters as how to avoid erroneous readings on navigational instruments, what to do if the ship sinks, and how to determine if it is safe to disembark. Medina had sailed in the West Indies, and his handbooks on navigation were indispensable for others who travelled there. This is an extremely attractive volume typographically, and an interesting and important example of illustration and decoration in an early Spanish scientific treatise. The map in this work is the same as the one that appeared in the *Arte de navegar* (cf. Lyell’s fig. 169). The *Regimiento* of 1552 had a slightly modified map, showing South America as far south as the Strait of Magellan.

Medina (1493-1567), a native of Seville, was one of the most eminent mathematicians and cosmographers of his day as well as an experienced pilot. His works were translated into French, Italian and Dutch, and served as textbooks throughout Europe.

FIRST and ONLY EDITION thus, bringing together for the first time Matthew Flinders’ *Investigator* journals and his *Memoir*, which he wrote to accompany his journals

and charts. These are among the most important primary texts in Australian maritime history and European voyaging in the Pacific. The editor's valuable introductions occupy volume I, pp. 1-96.

Captain Matthew Flinders, RN (16 March 1774-19 July 1814), a distinguished English navigator and cartographer, was the first to circumnavigate Australia and identify it as a continent. This was his third and most important voyage to the Southern Oceans. He did not live to see the publication of his widely praised book and atlas, *A Voyage to Terra Australis*, which appeared a few days after his death.

FIRST and ONLY EDITION of this collection of reports by civilian administrators in Mozambique, dealing with produce, disease, navigation, and relations with neighboring areas. Included are reports on German possessions in Africa and the Pacific; cotton and rubber; lighthouses (with detailed descriptions of sites and type of lights); mosquitos, flies, and the diseases they carry; the plague, beri-beri and scurvy; the port of Durban (South Africa); geography of the Lake Nyassa area and origin of the Inharrime River; the hut tax; and prohibition of the manufacture of alcohol by the indigenous population and the effect of such prohibition on indigenous emigration.

The folding maps show proposed lighthouses on the coast, soundings in the Baixo de Pinda and in the Limpopo River, and isogonic lines in the bay of Lourenço Marques.

First in a series published from 1908 to 1911 and sporadically thereafter.

In the wake of the Berlin Conference of 1884-85 and the humiliating British Ultimatum of 1890, the Portuguese became intent on making their presence felt within Angola and Mozambique by assigning civilian administrators, encouraging trade and industry, and sending expeditions into the unexplored areas far from the coast. Reports such as these (reprinted from the *Boletim oficial*) provide valuable sociological and ethnographic information on the state of the Portuguese colonies following the Scramble for Africa.

* OCLC: 237486772 (University of Florida). Porbase lists a copy at the Universidade Católica Portuguesa, with only 451 pp. and an unspecified number of folding maps.

POEPPIG, Eduard Friedrich. *Malerischer Atlas und beschreibende Darstellungen aus dem Gebiete der Erdkunde* Leipzig: Hartleben's Verlags Expedition, 1838. 8°, marbled paper boards (front joint gone, small defects at head and foot of spine), gilt-lettered navy label. Fraktur type. Some foxing. In good condition. vi, 304, iv pp., plus 18 plates. \$800.00

FIRST EDITION. The 18 plates in this volume, which did not appear in any of Poeppig's other works, include a forest fire in Brazil, a trip up the Marañón River, and the Cathedral of Lima. Subjects of the chapters include Matanzas (Cuba), Crete, Kurdistan, Baalbec, Antioch, Natal, the Cape of Good Hope, Damascus, Circassia, Peru, Lebanon, and Oman.

Eduard Friedrich Poeppig (1798-1868), German botanist, zoologist and explorer, was sent by the University of Leipzig to gather botanical specimens in North and South America. He spent considerable time in Cuba (1823-24), Pennsylvania (1824-26), and Chile, Peru, and Brazil (1826-1832). His visit to Chile, Peru, and then down the Amazon by raft and canoe to Pará was described in *Reise in Chile, Peru und auf dem Amazonenstromen während der Jahre 1827-1832*, printed in Leipzig, 1835 but not distributed until 1856. Although Poeppig lost some of his scientific data on the trip down the Amazon, he described over 4,000 plant species. Borba comments that "The account of his expedition and the botanical surveys he published are comparable to the work of Humboldt." The plant genus *Poeppigia* is named after him, as are the Silvery Woolly Monkey (*Lagothrix poeppigii*) and the orchid *Campylocentrum poeppigii* (Rchb. f.) Rolfe.
